

## Scenarios

### **Sign-up Scenario**

Given my credentials are not used by an account already  
And I am on the log in page  
When I click on sign up  
Then the sign up page opens  
When I fill in my credentials and click sign up  
Then I should be signed up for TriPhoto  
And I should be logged in and taken to the home page.

### **Log in Scenario**

Given I have a valid account  
And I am on the log in page  
When I type my credentials in and click log in  
Then I should be logged in and taken to the home page.

### **Log out Scenario**

Given there is an account already signed in on my phone  
When I click the cogwheel at the top right  
Then a drop down menu should appear with a log out option  
When I click the log out option  
Then I should be logged out of the phone and taken back to the log in page.

### **Create a group Scenario**

Given I am logged in with a valid account  
And I am on the home page  
When I click on the group management button  
Then I should be taken to the group management page  
When I click on the Create Group button  
Then a text field should pop up  
When I type in a group name and click enter  
Then a new group should be made  
And it should be my current group.

### **Invite a User Scenario**

Given I am logged in with a valid account  
And I am on the home page  
And I have a current group  
And the user I want to invite exists and is not in my current group  
When I click on the group management button  
Then I should be taken to the group management page  
When I click on the Invite User button  
Then a text field should pop up  
When I type in the email of a user and click enter  
Then that user should be invited to my current group  
When the next time that user logs in  
And they accept my invite  
Then their current group is updated as well.
